...THE PLACE IT ALL HAPPENS

Our own Dutch design impresses with progressive solutions and trend-setting ideas. Minimalistic and experimental, innovative-unconventional and with a winking sense of humor - this is how the typical Dutch design aesthetic can be described. Our design tradition is versatile, innovative, inimitable, serious-solution-oriented and playful-optimistic at the same time. It is a constant search for the balance between old and new, craft and technology.

With the perfect combination of inspiring colors, carefully selected materials and a keen eye for detail, our Catalogue 2025/2026 was created. Start your journey through our exciting must-haves and timeless classics.

When you consider Dutch culture, you can't help but think about dikes, windmills, wooden shoes and tulips. They seem cliché, but these classic icons intertwine with the region's geography and history.

But the Netherlands is more than a country with a rich historical and traditional heritage. This small country still manages to stand out for its great inventiveness, its problem-solving attitude, and its openness to the world.

OUR DRIVING FORCE

In our fast-moving time, a hotel room is more and more getting a place for rest and relaxation. That's why hotel items do not only have to be functional but also individual and comfortable. At Crown, we believe that our success starts from our people. Each and every one of us, with our varied abilities, strengths and potential. A culture should be built from the inside out.
