FARE TROLLEY SYSTEM

craster

Fare Trolley System

A configurable F&B distribution and display system, the new Fare Trolley System offers operational efficiency across a property from morning to night.

Designed to a gastronorm footprint, this modular approach allows trolleys to be used in isolation or built out to larger stations using the drop in bridge.

The contemporary metal frame is complemented by a selection of materials (hardwoods and HPL available) which are reversible and replaceable, extending the longevity of the product.

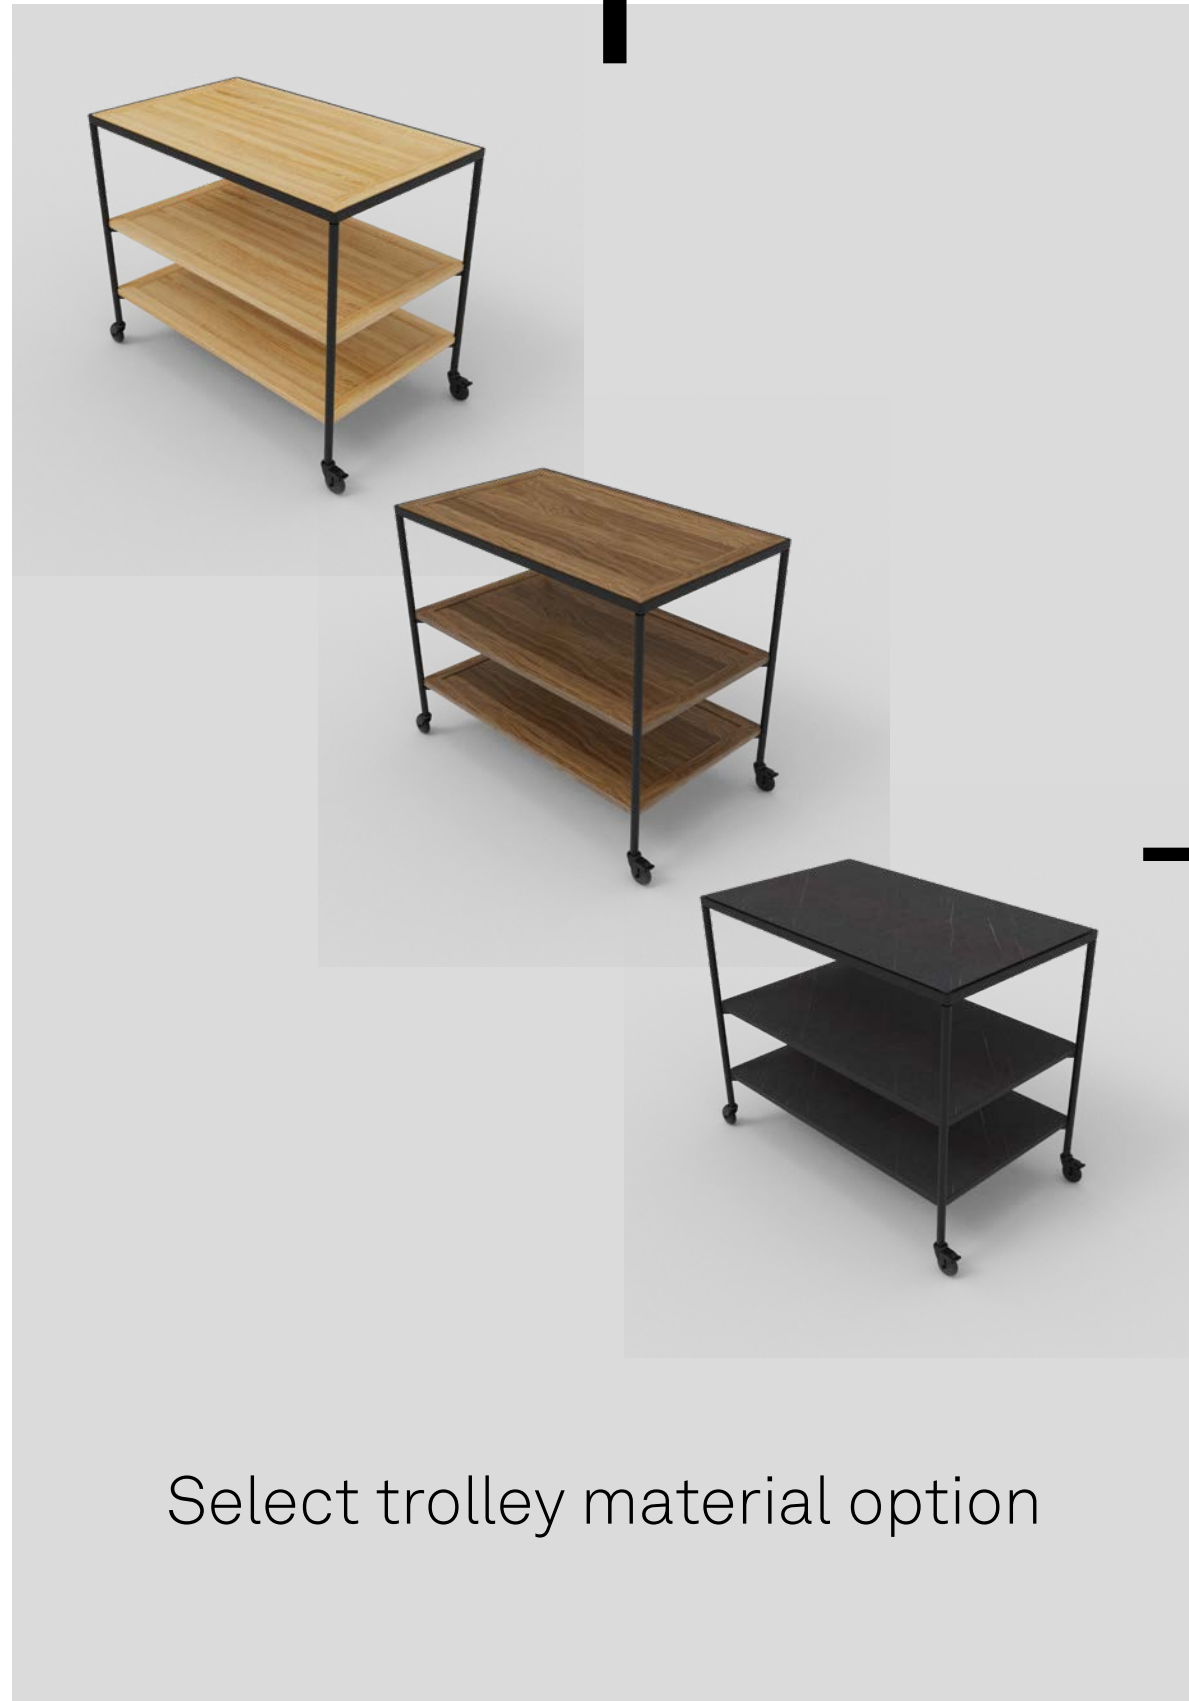

Additional accessories extend the functionality with speed rails to maximize surface area and panels to conceal lower and middle shelves available, allowing the system to spend as much time as possible front of house.

Foundations and Elements

Bridge & Accessories drop on to top rail. Bridge can be stored on top of trolley for distribution – store product on the lower 2 shelves.

Panel folds for storage and wraps around 3 sides. Available to cover both shelves, bottom shelf, or middle shelf options.

Reversible Top / Shelves. Panels can be reversed to prolong longevity (wooden panel) or with different HPL colours.
